

## Notes

Creative director: Christie Chen

Designer: Dani Sas

- Hierarchy with title/ page headers
- Nav bar + page headers might be a little big
- Mobile:
  - Break up text with images
  - Maybe introduce the cipher a bit more
- Desktop:
  - Coding possibilities:
    - css background images for the pages
    - Section the paragraphs inside divs so that you can change the background image / div size without changing paragraph column width
      - You can also pad the paragraph or the div appropriately!
    - Separate classes for 1 page div and 2 page div
      - Easily changeable when sizing responsively with media-queries
    - Let me know if anything comes up!
- Footer! Info wise, I think just a link to the wiki article as a source is enough :)

Awesome job and I can't wait to see the final!
