Notes

Creative director: Christie Chen

Designer: Dani Sas

Project: The Zodiac Killer

- Main content vs footers hierarchy
 - Things confirmed vs. things we have suspicions for
 - Focus on main content (footers can be secondary)
- I'll send you a doc with the copies for each section by tomorrow night! (Nov 4th evening)
- Typeface: monospace; feel free to explore, but I think monospace works best
- Keep images pretty much just as images
- Low opacity of an image otherwise present on the page as background for texture
- Using cipher shapes + zodiac symbol to unify pages and add visual interest
- Unofficial possible meeting before next class if anyone has questions as they work
- If there are any technical concerns w/ the mockup, feel free to text me/slack me a screenshot and ask! I can help guide development if needed :)
